

Behind Every Good Student...

Register today to participate in CPhA's newly established **Student-Mentor Program!** This program has been created to provide students with access to pharmacists in a variety of practice settings, geographical areas, and professional backgrounds to provide guidance and answer questions that will simplify the transition from student to pharmacist.

Pharmacists participating in the program should expect:

- Contact with students who may be interested in your particular practice specialty, geographical location, or have general questions about the profession they have chosen to become a part of.
- Opportunity to share experience and knowledge with pharmacy students.
- Provide networking opportunities when available, to assist the student in obtaining information on specific areas of interest.
- Once contacted by a student, a workable schedule of interactions (live, e-mail, telephone, twitter, facebook, etc) should be generated by both parties.

Students participating in the program should expect:

- Access to CPhA member pharmacists to answer questions you might have about specific areas of pharmacy, questions about geographical areas to practice in, or just information on basic pharmacy related issues.
- Opportunities to interact with pharmacists to whatever extent that is agreed upon by student and mentor both.
- Opportunities for face to face meetings with the mentor at CPhA or affiliated local association events.
